More Poultry - Needed -

**Do Your Part —
be a producer and
increase the supply**

**ISSUED BY THE
ANIMAL HUSBANDRY DIVISION
UNITED STATES DEPARTMENT OF AGRICULTURE
WASHINGTON, D. C.**

MORE POULTRY NEEDED

BE A PRODUCER

1—KEEP BETTER POULTRY:

Standard-bred poultry increases production and improves the quality.

2—SELECT VIGOROUS BREEDERS:

Healthy, vigorous breeders produce strong chicks.

3—HATCH THE CHICKS EARLY:

Early hatched pullets produce fall and winter eggs.

4—PRESERVE EGGS FOR HOME USE:

Preserve when cheap for use when high in price.

5—PRODUCE INFERTILE EGGS:

They keep better. Fertile eggs are necessary for hatching only.

6—CULL THE FLOCKS:

Eliminate unprofitable producers and reduce the feed bill.

7—KEEP A BACK-YARD FLOCK:

A small flock in the back yard will supply the family table.

8—GROW YOUR POULTRY FEED:

Home-grown feed insures an available and economical supply.

9—EAT MORE POULTRY AND EGGS:

By eating poultry and eggs more freely you will conserve the meat supply.

For further information or individual advice on poultry raising write to your State Agricultural College, or to the Animal Husbandry Division, Bureau of Animal Industry.

UNITED STATES DEPARTMENT OF AGRICULTURE
WASHINGTON, D. C.

An urgent appeal is made to the American people, particularly every farmer, every resident of towns and cities who have an available plot of ground, to raise poultry—more poultry—as a means of increasing the food supply. The plans of action as set forth on the inside pages are urged in order to accomplish this purpose.
